

## **Term 2: Beyond You**

This session assists students to explore the meaning of faith and religion for people and the concept of a Christian God. It provides context by discussing the mix of good and bad that happens in our world and our relationships - with ourselves, others, and God. Through a range of activities and discussion students reflect on these relationships and are presented with the Biblical promises of God, who Christians believe is with us and who intends love and good for creation and all people. This session allows for discussion and questions about what faith means and how it impacts people's lives and actions around the world (and into forever). It concludes with the fact that our values, actions and choices impact others, good or bad, and that Christianity (and a God beyond humanity) aims to make a good difference in the world (even though Christians are real people and make mistakes too).
